UOP Callidus Rental Flare Services

Advanced rental flare technology

RENTAL AND REPLACEMENT FLARES FOR
PETROCHEMICAL AND HYDROCARBON PROCESSING

A Honeywell Company
UOP Callidus Rental Services

Rental Services
The UOP Callidus Rental Group has the unique ability to bypass the normal work flow with our own project design and management team to fulfill all of our customer’s rental needs. If it’s not in our vast inventory of existing parts and equipment, we can create a unit or modify an existing unit in a short amount of time. If you have an unexpected or short term rental need or have some questions and just need some advice, let our experienced team help you.

UOP Callidus also offers complete installation, start up and other aftermarket services to fit all your combustion needs.

Responsive
In response to market demand, UOP Callidus maintains an inventory of rental flares, oxidizers, combustors, and other equipment to provide quick, safe solutions when regular equipment requires maintenance or becomes inoperable.

Choices
Selection of the type of equipment that is needed will be influenced by several factors, including the availability of space, the composition of the waste gas, flow rates, pressures, as well as radiation requirements. UOP Callidus rental equipment is available for all types of flow rates and waste gas compositions.

 Guarantee
As with all UOP Callidus equipment, our rental units are rigorously inspected by our quality assurance personnel before leaving our facility, and come with the full warranty and great customer service.
Test Facility
The UOP Callidus test facility is in continual use for combustion technology research and development as well as customer witnessed demonstrations. Our array of test systems allows us to closely match actual field operating conditions, providing results which will more accurately predict actual measured performance.

Global Coverage
UOP Callidus reaches the global market through our headquarters located in Tulsa, Oklahoma, USA with regional direct sales offices and independent sales representation around the world. Meeting our customers’ expectations and setting the standards for the combustion industry have always been our company goals. Each burner, flare, thermal oxidizer and catalyst system we design and manufacture is built with those goals in mind.
